### SUMMARY

*Creative full stack web developer dedicated to developing and optimizing interactive, user-friendly, and feature-rich websites. I leverage analytical skills and strong attention to details to deliver original and efficient web solutions, provide technical knowledge and expertise, build websites from scratch and successfully manage teams.*

## Projects

### ELEC-CHAIN

Election app for the specific country. Like everyone over the legal age for election can get to the site and vote for voters. All our ideas are about making an integrity election and no one can change the votes. We will do that by using blockchain

**Technologies used:**  **node**  **express**  **mongoDB**.  
**WEBSITE:** <https://cutt.ly/wf9Llkr>  
**GITHUB:** <https://cutt.ly/Of2Tq1E>

### FAC APT

A job provider for the Founders & Coders members, where the graduates could look for jobs and present their interests in the ones which they like to work on

**Technologies used:**  **node**  **express**  **PostgreSQL**.  
**WEBSITE:** <https://cutt.ly/1f9LmtU>  
**GITHUB:** <https://cutt.ly/yf2R5LI>

### YHANGRY

a platform allowing customers to book a chef for meal prep or dinner party.

**Technologies used:**  **node**  **express**  **mongoDB**.  
**WEBSITE:** <https://cutt.ly/Lf9LQwF>

## PROFESSIONAL EXPERIENCE

**Full-Stack Web Developer** Oct 1st, 2019 - Mar, 2020  
Google for Startups

- Collaborated with a team of developers to take the website from nothing to a fully-functioning website.
- Implemented web design and development principles to build a stable software.
- Monitored website performance and rectified front-end and back-end related issues.
- Communicated technical issues in an understandable manner to the team.
- Provided guidance and troubleshooting support to clients.
- Maintained an organized workflow using project management tools (GitHub and Trello).

**Technologies used:** *React, Node, Express and PostgreSQL*
